

Discover the Power of Word Searchable Microfilm
Search for key words, link to source materials, create searchable PDFs

ScanPro[®] 2000

We're revolutionizing the way you use microfilm. With the ScanPro 2000's new OCR technology you can convert your microfilm image to word searchable text, edit, link to information sources and save to any output with just a single click. No other microfilm equipment on the market offers this capability.

Research tools¹ that make working with microfilm easy and fun.

- If you want more information on a word within your microfilm image, just click the INFO-Link button and the word to open a reference source like Wikipedia, a dictionary, or thesaurus.
- Find words within your microfilm image. Click the WORD-Search button and enter a word in the search box to highlight that word everywhere on the page.
- Select information on your microfilm image and copy it to the clipboard as text for pasting into any document.
- With a single click you can convert any microfilm image to a word searchable PDF, single page or multiple page.

Choose the ScanPro® 2000 for Ease of Use, Performance and Value

“There is an app for everything you want to do with microfilm, I just love it.”

-Lori Bessler
Wisconsin Historical Society

“The software looks and operates like cutting edge web environment programs. It has instant user appeal.”

-Karen Oye
Case Western Reserve University.

“We have film that’s difficult to work with, the multiple edit options are easy to use and absolutely priceless!”

-Claire Moran
Genealogy researcher

Easy to Use

The ScanPro 2000 software is an intuitive Windows® computer application with familiar icons and text labels. Just CLICK the Film Selection Wizard to automatically set up your scanner. All controls are conveniently arranged by folder tabs to insure simplicity and ease of access. And, an on-screen help menu is available for all controls to help any user at any time.

Performance

Small and compact, the ScanPro 2000 fits almost anywhere. One CLICK on-screen buttons complete look ups and research quickly and efficiently. The combination carriers for all film types are easy and fast to operate.

Value

The ScanPro 2000 is built for durability in public use applications. The construction is heavy gauge steel throughout and all moving parts use steel bearings for long term reliability. One of our customers reports *“The low cost of (the ScanPro) maintenance is amazing!”*, -Toronto Public Library.
